

WAX SEAL INFORMATION SHEET

OUR WAX SEALS ARE INDIVIDUALLY PRESSED INTO REAL SEALING WAX

Every seal you order is pressed into real sealing wax by our designer using a wax stamp, to ensure quality and consistency. Either our raw edge finish or with an adhesive backing, our wax seals are made one-at-a-time and finished by hand with your choice of colour, style and design.

WAX STAMPS

- Solid Engraver's Brass Die to create a crisp impression in wax
- Food safe and usable on clay, ice, metal, wax, and more

SHAPE EDGE STYLES

Round (most popular) Oval, Square & Rectangle

WAX SEAL SIZES

0.75" (19mm), 1" (25mm) most popular, 1.25" (32mm)

HOW TO CHOOSE THE RIGHT STYLE FOR YOUR WAX SEALS

MODERN EDGE

Perfectly created with a clean and consistent wax seal edge for a uniform look from seal to seal.

Available with self adhesive backing.
Great for DIY.

ORGANIC EDGE

Perfectly created with a slightly irregular wax seal edge for an organic look from seal to seal.

Available with self adhesive backing.
Great for DIY.

ARTISAN EDGE

Perfectly created with a rustic and varied wax seal edge for a that completely unique, "hand-poured" look from seal to seal.

Available with self adhesive backing.
Great for DIY.

THE SAFEST WAYS TO MAIL WAX SEALS

Whether your wax seals are on the invitation or the envelope, sending your wax seals through the mail is safe to do so. They won't crack or break due to the high quality flexible wax materials used. because of the flexible wax materials we use,

WANT TO DIY WITH WAX SEALS?

If you are DIY your invitations and would like to apply the wax seal yourself, the best & fool-proof way to enjoy the wax seal experience without worry about damaging you or your invitations with hot wax is to use the self-adhesive option!

Please let us know where you are applying the wax seals so that we can ensure the correct adhesive is added to the back.

ADHESIVE BACKING FOR EASY USE

Our pre-made wax seals are finished with your choice of adhesive backing. With Professional Clear, Professional Grade and Resealable available, our adhesive options have been carefully tested to ensure quality of hold and easy use.

PROFESSIONAL GRADE

The most popular adhesive as chosen by our invitation designers, this is our strongest level of adhesive and is perfect for almost all surfaces.

We highly recommend selecting this option when mailing your wax seals or using it on packaging or a curved surface.

Recommended Surfaces:

- Thick, Textured Paper/Cardstock
- Coated or Glossy Paper/Cardstock
- Specialty Surfaces (Ribbon, Twine, Wood)
- Coated Surfaces (Plastic, Vellum*)
- Glass, Bottles, Curved Surfaces**

Special Notes:

This adhesive may tear the surface underneath if removed.

*If using vellum sealing wax or placing your seals on a clear surface, make sure to select the Professional Clear option or ask our team to assist you.

**If you are placing your wax seals on a curved surface, let our team know when you place your order so we can optimize your wax for this application.

RESEALABLE

Like a Post-It Note, this type of adhesive allows seals to be removed cleanly from a wide range of surfaces, then reapplied 3-5 times without tearing.

We recommend our Resealable Wax Seals for any delicate surface or application.

Recommended Surfaces:

- Mirrors
- Escort Cards
- Seating Charts
- Laser Cut Stationery and Flat Gate-folds
- Tissue Paper

Special Notes:

If you want to use your seals to hold a gate-fold closed that has pressure behind it, you will need to select Professional Grade Wax Seals.

This style of adhesive is not suitable for mailing without the use of an outer envelope.
